

Gaurav Tomar

Full Stack Developer | React.js, Node.js, TypeScript

+91-9639508340 | gauravtomar977@gmail.com | LinkedIn | GitHub

Computer Science and Engineering

PROFESSIONAL SUMMARY

- Frontend Developer proficient in React.js, TypeScript, Redux Toolkit, and component-driven architecture. Experienced in state management, RESTful API design and consumption, client-side and server-side pagination, and performance optimization techniques including lazy loading, virtual scrolling, and Progressive Web Apps (PWA). Complementary backend knowledge in Node.js, Express.js, and MongoDB. Strong emphasis on clean code, scalability, and maintainable application design. .

EDUCATION

•Bachelor of Technology in Computer Science and Engineering

2022-2026

Dr. APJ Abdul Kalam Technical University, Moradabad

CGPA: 8.1/10

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C++

Frontend Technologies: React.js, Redux, Redux Toolkit, React Hooks, Context API, NgRx, Sass, Tailwind CSS, Responsive Design, Component-Driven Architecture, REST API Integration

Backend Fundamentals: Node.js, Express.js, RESTful API Design, JWT Authentication, WebSockets, Socket.io, Middleware Integration

Databases: MongoDB, MySQL, Mongoose ODM

Performance Optimization: Lazy Loading, Virtual Scrolling, Web Workers, Service Workers, Progressive Web Apps (PWA), Client-Side & Server-Side Pagination, Infinite Scrolling, Caching, Code Splitting

Tools & Practices: Git, GitHub, Visual Studio Code, Postman, Unit Testing, Version Control

Core Subjects: Data Structures & Algorithms, Operating Systems, Object-Oriented Programming, Database Management Systems, Software Engineering

PROJECTS

•DevConnect App

Full-stack developer matchmaking platform with real-time chat and secure authentication.

- Architected a full-stack application using React.js, TypeScript, Node.js, and MongoDB, deployed to production and supporting 500+ registered users.
- Integrated real-time bidirectional chat using Socket.io (WebSockets) with event-driven architecture, achieving low-latency communication under high concurrency.
- Designed and developed 15+ RESTful APIs with JWT-based authentication, input validation, error handling, and modular middleware integration.
- Boosted application performance by 30% by implementing Redux Toolkit for state management, reducing unnecessary re-renders and optimizing API call frequency.

•Real-Time Chat Application

Scalable real-time messaging system with WebSocket communication and responsive UI.

- Built a real-time chat system handling 300+ concurrent users using Socket.io (WebSockets) with room-based event-driven architecture.
- Developed and documented RESTful APIs using Node.js and Express.js, implementing efficient data handling.
- Implemented JWT-based authentication with token validation and session management; designed responsive UI using React.js, Redux Toolkit, and CSS Flexbox.

•ReelStream (TMDB API)

Feature-rich movie streaming UI with AI-powered search and optimized frontend performance.

- Developed a fully responsive React.js application consuming TMDB API, featuring dynamic content rendering, category browsing, and search functionality.
- Implemented Redux Toolkit for global state management across 10+ components, minimizing re-renders and improving rendering performance by 25%.

ACHIEVEMENTS & CERTIFICATIONS

•**Problem Solving:** Solved 100+ problems on LeetCode and GeeksforGeeks focusing on Data Structures, Algorithms.

•**Namaste React:** Advanced React.js training—Hooks, Context API, Redux Toolkit, reusable components.

•**Namaste Node.js:** Backend development—Node.js, Express.js, RESTful API design, JWT authentication.

•**Generative AI | Microsoft & LinkedIn Learning:** Fundamentals of Generative AI, large language models (LLMs).
